IDENTIFIERS	*Sequential Tests of Educational Progress (STEP)

ABSTRACT

This report is the sixth of a series of reports having to do with item studies of the Sequential Tests of Educational Progress (STEP) regularly administered to students in grades four, six, eight, ten, and twelve enrolled in the public school system in Hawaii. The item study summaries prepared for achievement tests administered at the various grade levels involved fifteen separate tests, 900 test items, and 65 thousand individual students. Since each student took three achievement tests, an item count was made for approximately 196 thousand students. This report is in two sections: Part I presents the item study summaries by grades and subject areas for the state; Part II presents the item study summaries by grades and subject areas for each of the seven districts. ITEM STUDY SUMMARY REPORT
SEQUENTIAL TESTS OF EDUCATIONAL PROGRESS (STEP)
Reading, Mathematics and Writing
For Grades 4, 6, 8, 10 and 12
By State and District
School Year 1970-1971

INTRODUCTION

This report is the sixth of our series having to do with item studies of the Sequential Tests of Educational Progress regularly administered to our students.

An item study of standardized test results provides one important objective clue as to the strengths and weaknesses of various parts of the instructional program. It is an extremely valuable tool for the classroom teacher, the administrator and the curriculum planner. Hence, the purpose of this item study summary report is to help point out those concepts, skills, understandings and activities that may need further emphasis in our instructional planning.

Item study listings and summaries have been prepared by the electronic computer, thus, relieving the teacher and students of much clerical work. The item study summaries prepared for the achievement test administered at the various grade levels this year involved 15 separate tests, 900 test items, and 65,000 individual students. Since each student took three achievement tests, an item count was made for approximately 196,000 students.

This report is in two sections -- Part I presents the item study summaries by grades and subject areas for the state, while Part II presents the item study summaries by grades and subject areas for each of the seven districts.

PART I

SECTION A. STATE ITEM STUDY SUMMARIES

This section presents item study summaries for the State of Hawaii in terms of Per Cent Correct Response for each test item for each test. The tests include STEP Reading, STEP Mathematics, and STEP Writing administered in the fall of 1970 to students in grades 4, 6, 8, 10 and 12. See Tables 1-15.

Per Cent Correct Responses for the items by the publisher (Publisher's Norms) are also included in the tables. Differences or deviations of our State norm (per cent below the publisher's norms) have been indicated with a minus(-) sign after the Per Cent Correct Response figure in the State norm column. At the end of the State column in Part 2, the total number of items with per cent above (+), per cent below (-), or per cent equal (=), is indicated. See page 7 which gives 27+, 42-, and 1= for the Reading test. The same statistics are shown on all print outs for use in comparing your school's performance with that of either the district, state or publisher's norm groups.

To facilitate the use of the item study on these tests in terms of instructional planning, items in the Skill Categories and Type of Materials used to assess these skills have been included and starred as clusters in the appropriate columns. The code (A, B, C, D, ...) and item descriptions for each category are printed in the lower left-hand corner at the end of Part 2 for each test for easy identification. This is followed by PARTS which give the number of items in each cluster category. For more detailed information, see STEP Teacher's Guide*.

---

*STEP Teacher's Guide. Educational Testing Service. Princeton, New Jersey, 1959.

The total number of items forming a cluster under each Skill Category and each Type of Material is shown at the bottom of each item description column. See page 7. Directly below that is the compiled number of items in which the State is below that of the publisher's norm with the corresponding per cent given in the third line. A per cent of 50 or more (which means half or more of the items below publisher's norm) suggests weakness in that cluster category and needs investigation to determine the kinds of concepts, skills, understandings and activities that may require emphasis. See Table 1 on page 7.

For the first time, mathematical calculations summarized by computers are printed directly at the bottom of the item description category columns in the item study summaries for each classroom section, the combined school grade, the district and the state. These should help facilitate analysis of group performance to aid in instructional planning.

Curriculum Implications

In determining the strong and weak points of students in the class, the teacher should consider the clusters of items listed under each category. He should note the frequency and extent of deviation of the per cent correct response of his class or school from the norm group used -- be that of the publisher, the school, the district or the state. If half or more of the items in a cluster category is below the comparative norm group used, investigation and action are indicated. The teacher should refer to those test items in the test booklet and study them in terms of:

(1) the skills, concepts, and understandings being taught or needing to be taught in that particular class or grade,

(2) the relevancy of the test items,

(3) the importance of these items in our curriculum, and

(4) the planning of instructional activities to meet the needs of his students.

However, he does not teach to those specific test items.

Section B. This section presents the State item study summaries by subject areas and grades.

Part II. District item study summaries for each of the seven districts are presented for each grade and subject area tested.

The same procedures given above for use with the State item study summaries should be followed in using the district, the combined school grade and the school classroom section item study summaries.

Individual School Item Study Summaries

Besides the State and District item study summaries given in this report, each school received an item study summary for each classroom section and a combined summary for each grade for the STEP Reading, Mathematics and Writing tests administered during the fall of 1970. These individual school summaries were sent to each school and also to the respective district offices to provide one important objective source of information to aid in improving the instructional program. Each school is expected to study the item study summaries prepared for each classroom section and combined grade level according to the procedures outlined above. We strongly urge each school to devote at least one faculty meeting to acquaint its staff with the use of these item study reports. In secondary schools it may be desirable to meet by departments to analyze these

reports for curriculum implications. Schools in a complex may wish to work together for more effective analysis, coordination and continuity in terms of curricular planning.

SECTION B. STATE ITEM STUDY SUMMARIES BY SUBJECT AREAS

This section deals with item study summaries by subject areas. The data presented should be studied carefully together with Section A and also with the item study summaries prepared for your school classroom sections and combined grade level by classroom teachers, principals, academic department heads, district curriculum workers and state curriculum planners for curriculum implications.

Tables 16 to 18 present item study summaries for STEP Reading, Mathematics and Writing for grades 4, 6, 8, 10 and 12 for the fall of 1970.

An explanation of each cluster category precedes the table for a subject area which is followed by a brief summary of results and trends.

Let us look at Table 16 on the STEP Reading Test. The columns show:

I - Number of items in each category.

II - Number of items in that category below the publisher's norm, and

III - The corresponding per cent of items below the publisher's norm.

The starred per cents (50% and above) in Column III show half or more of the items in that cluster category deviating below that of the publisher's norm. These indicate weaknesses and the teacher or curriculum planner should investigate and check out these test items under the various categories in the test booklet to determine what skills, concepts, understandings and activities are considered relevant to our educational objectives and take appropriate action in meeting those needs.

Trends for the six-year period (1965-1970) for the grades and subject areas tested have been summarized. The grades showing weakness repeatedly in the Skill Categories and Type of Materials over those years have been listed to give an indication for investigation.

STEP Reading Test

Listed below are explanations of categories* according to which the items were classified by the publisher:

SKILL

Ability to REPRODUCE IDEAS. Comprehending subject-predicate, pronoun-antecedent, modifier-thing modified, and dependent-independent clause relationships; noting frequency of mention; and recalling sequences of ideas or facts.

Ability to TRANSLATE ideas and MAKE INFERENCES. Identifying ideas found in the passage when they are stated in language different from that of the selection; picking out the main idea; deducing the meaning of figurative, technical, and obscure words, phrases, or sentences; linking ideas to their preceding and following context; applying ideas to new situations; and making specific inferences.

Ability to ANALYZE MOTIVATION. Analyzing the author's purpose and the attitudes, beliefs, experience, knowledge, etc., which influenced what he said.

Ability to ANALYZE PRESENTATION. Recognizing and appraising literary devices and forms, "tone", logical structure, and other aspects of the ways selections are written.

Ability to CRITICIZE. Criticizing constructively the ideas presented, the author's purpose and motivation, and the presentation.

TYPE OF MATERIAL

DIRECTIONS, ANNOUNCEMENT
Article of INFORMATION or EXPLANATION
LETTER (narrative and essay)
STORY
POETRY
Article of OPINION or INTERPRETATION
PLAY (dialogue)

STATE TOTALS	154	97	63*	171	83	49	154	85	55*	161	99	61*	149	104	70*

*The starred per cents (50% and above) in column III show half or more of the items in that skill category cluster deviating below that of the publisher's norm. They indicate weakness and the teacher or curriculum planner should investigate and check out these items in the test booklet to see what concepts, skills and understandings in the cluster of items that may need emphasis.

Table 16 shows: I--Number of Items in Category.

II--Number of Items Below Publisher's Norm.

III--Per Cent Below Publisher's Norm.

Summary of STEP Reading Test

A. Item study results for the STEP Reading test for 1970 in Table 16 reveal the following:

- The 4th, 8th, 10th and 12th graders were weak in reproducing ideas.
- The 4th, 6th, 10th and 12th graders were weak in translating and making references.
- All five grade levels did poorly in the skill category of analyzing motivation.
- All five grade levels showed weakness in analyzing presentation.
- The 4th and 12th graders were weak in criticizing constructively ideas presented.

In terms of types of materials used, item study results show:

- All five grade levels had difficulty with directions and announcements.
- The 4th, 10th and 12th graders had difficulty with information and explanation.
- The 4th, 6th, 8th, 10th and 12th graders had difficulty with letters (narrative and essay).
- The 8th, 10th and 12th graders had difficulty with stories.
- The 4th, 6th and 10th graders had difficulty with poetry.
- The 4th, 8th, 10th and 12th graders had difficulty with opinion and interpretation.
- The 4th, 6th, 8th and 12th graders had difficulty with plays (dialogue).
- Except for poetry, the 12th graders had difficulty with every category, with the greatest lack in letters.

B. Trends over the six-year period (1965-1970) show the following grades with weakness repeatedly in these Skill Categories and Types of Materials:

- Reproduce Idea - Grades 8, 10 and 12.
- Translate and Make Inferences - Grades 10 and 12.
- Analyze Motivation - Grades 4, 8, 10 and 12.
- Analyze Presentation - Grades 4, 8, 10 and 12.
- Criticize - Grades 4 and 12.
- Directions, Announcements - Grades 8 and 12.
- Information, Explanation - Grades 4 and 12.
- Letter - Grades 4, 6, 8, 10 and 12.
- Story - Grade 10.
- Poetry - Grade 4.
- Opinion, Interpretation - Grades 4, 10 and 12.
- Play (dialogue) - Grades 4, 8 and 12.

These trends provide an objective source of valuable clues to be used along with other relevant factors in improving our instructional program.

STEP Mathematics Test

Listed below are explanation of categories* according to which the items were classified by the publisher:

CONCEPT

NUMBER and OPERATION. Cardinal and ordinal; grouping by ten; bases of number systems; scientific notation by powers of ten; meaning of fractions, decimals, and percent; kinds of number (e.g., integral, rational, irrational, positive, negative, real, complex, even and odd); appropriate arithmetic processes for solving processes by manipulation of physical objects; significant digits and rounding off; algorisms; reasonable estimates; approximate numbers; associative, distributive, and communitative laws as applied implicitly in computations.

SYMBOLISM. Use and nature of symbols, such as %, =, >; <; interpretation of signs of operation, special notation, and algebraic symbolism.

MEASUREMENT AND GEOMETRY. The inverse relationship between the size of a unit and the number of units in a given measurement; significant digits as they apply to precision of measurement; denominate numbers; converting units; spatial estimation; geometric nomenclature; areas and volumes of figures; transformations and invariants; statistics, if thought of as data measurement; different kinds of rates (since they may involve different denominate numbers).

---

*STEP Teacher's Guide. Educational Testing Service. Princeton, New Jersey. 1959.

FUNCTION and RELATION. Graphs; algebraic functions; ratio; proportion; solution of equations; algebraic processes; trigonometric functions; periodicity; mapping and scale drawing; similarity; congruence; inequality.

PROOF. Deductive and inferential reasoning. The logic type of problem involving reasoning about classes or sets; sufficiency of data for a solution; hidden or tacit assumptions in an argument; logical inferences; generalizations from data.

PROBABILITY and STATISTICS. Extrapolation of graphs depicting trends; prediction of an event on the basis of past performance, or on the basis of opportunities to occur; average (mean); median; correlation; sampling; data interpretation.

*Indicates weakness in that cluster of items and may need emphasis.

Table shows: I--Number of Items in Category.

II--Number of Items Below Publisher's Norm.

III--Per Cent Below Publisher's Norm.

Summary of STEP Mathematics Test

A. Item study results for the STEP Mathematics Test in Table 17 reveal the following:

- The 4th graders did poorly in all six concept and skill categories.
- The 6th graders showed weakness in all categories except for symbolism.
- The eighth graders performed less well than last year as they showed weakness in four out of six categories.
- The 10th graders showed weakness in measurement and geometry, proof and probability and statistics.
- The 12th graders had difficulty in three categories - number operation, proof and probability and statistics.
- The 6th, 8th, 10th and 12th graders performed well in symbolism.
- All five grade levels were weak in proof which consists of deductive and inferential reasoning.

B. Trends over the six-year period (1965-1970) show the following grades with weakness repeatedly in these mathematical concepts:

- Number Operation - Grades 4 and 8.
- Symbolism - Grade 4.
- Measurement, Geometry - Grade 4.
- Function, Relation - Grade 4.
- Proof - Grades 4, 6, 8, 10 and 12.
- Probability, Statistics - Grades 4, 10 and 12.

These specific weaknesses should provide us with clues to work with our students.

STEP Writing Test

Listed below are explanations of categories* according to which the items were classified by the publisher:

SKILL

ORGANIZATION. Reasonable ordering of ideas, events, facts, etc.

CONVENTIONS. Attention to syntax or sentence structure, diction in the sense of gross errors of word choice, punctuation and spelling.

CRITICAL THINKING. Detection of unstated assumptions, perception of cause-and-effect relationship, and anticipation of the needs of the reader.

EFFECTIVENESS. Adequacy of emphasis, adequacy of development, exactness of expression, economy, simplicity, and variety.

APPROPRIATENESS. Choice of a level of usage suitable to purpose and reader; i.e., using the right "tone" and appropriate diction and employing tact where possible.

Table shows: I--Number of Items in Category.
II--Number of Items Below Publisher's Norm.
III--Per Cent Below Publisher's Norm.

Summary of STEP Writing Test

A. Item study results for the STEP Writing Test for 1970 in Table 18 reveal:

- The 4th and 10th graders performed very well on the writing test as none of the percent of items below the publisher's norm exceeded 50 per cent.
- The 6th graders showed weaknesses in conventions, effectiveness, appropriateness, minutes, letter, story, editorial, directions, personal narrative and news story.
- The 8th graders had difficulty with every category except questionnaire.
- The 12th graders showed weakness in all categories except in announcement, advertisement and report.

B. Trends over the six-year period (1965-1970) show the following grades with weakness repeatedly in these Skill Categories and Types of Materials:

- Organization - Grade 12.
- Conventions - Grades 8 and 12.
- Critical Thinking - Grades 8 and 12.
- Effectiveness - Grades 8 and 12.
- Appropriateness - Grade 12.
- Minutes - Grade 6.
- Letter - Grade 8.
- Story - Grade 8.
- Announcement, Advertisement - Grade 8.
- Report - Grade 8.
- Editorial - Grades 6 and 12.
- Essay - Grade 12.

- Directions - Grade 8.
- Personal Narrative - Grade 12.
- Character Study - Grade 12.

These objective clues provide us with one source of information in working with students in the writing area.

*1964 data used for the year 1965.

General Summary

These item study results give us objective clues regarding our strengths and weaknesses in skills, concepts, understandings, types of materials and subject areas based on the STEP tests.

The item study summaries by grades and by subject areas point to certain specific needs in reading, mathematics and writing. Trends over the six-year period give additional cumulative information on student performance which merit investigation, thought and action. See figure 1. Classroom teachers, principals, department heads, district curriculum workers and state curriculum planners should study the data carefully in terms of the relevancy and importance of the various categories, concepts and understandings to our educational objectives and take appropriate action.

Additional information on item study summaries on the STEP achievement tests published previously to help curriculum planners may be found in Research Reports No. 68 and No. 69 for 1968-1969, Research Report No. 62 for 1967-1968, and Research Reports No. 22, No.22A and No. 42 for 1965-1966.
